

# NAVCOM X

REVOLUTIONARY SOLUTIONS FOR INCREASED EFFICIENCY OF ALL SECTORS

Introducing NavCom X, a revolutionary location-based device that takes transportation tracking to a new level.

**NavCom X** provides precise positioning capabilities, with an accuracy of up to 1,5 m, in any environment, opening up new possibilities for increased productivity, safety, and cost efficiency.

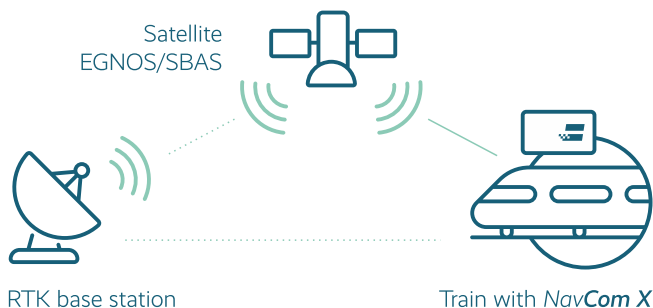

## NAVCOM X OFFERS A NUMBER OF ADVANTAGES

- **Enhanced remote monitoring in real time:**  
in addition to the precise position of the vehicle/cargo
- **Modularity**  
allows for a custom-built solution tailored to your needs, whether you require a device powered from the mains or designed for field use, with a display, camera, or without.
- **An affordable solution:**  
NavCom X is an affordable solution that is suitable for all types of transportation in different sectors
- **Easy to install**  
NavCom X is easy to install and requires no heavy modifications. Compatible with a variety of systems: NavCom is compatible with various third party applications
- **The reliability and security of navigation data**  
are ensured through resistance to GNSS signal interference, while the integration of Galileo Open Service Navigation Message Authentication (OSNMA) provides a high level of protection against spoofing.

**NavCom X** – a new dimension in optimizing operations, vehicle tracking, and collecting historical data for analysis and prediction.

## HOW IT WORKS

**CONTACT** us today to find more about NavCom X.
