recognized tracks

Evidence of Eligibility

A complete overview of train drivers
track and locomotive knowledge

About EVP

- EVP is an advanced tool for managing track and locomotive knowledge for train drivers, significantly simplifying the organization of railway operations
- EVP helps maintain up-to-date information on driver qualifications, automatically renews knowledge, and provides clear visualization of tracks
- The system allows users to easily enter and manage new knowledge, including the possibility of manual renewal

Excellent tool for managing train drivers' knowledge with automatic renewal from actual runs

Quick access to all drivers in one place

Each driver's route knowledge can be visualized directly on the map

A driver's knowledge can be easily renewed based on real routes

Focus on one selected route with full details at a glance

See exactly when route knowledge is valid

Advance alerts for expiring knowledge

3 Expired familiarisation
